Securing the skies, defending what matters

AI-powered Autonomous ISR Drone for Faster, Smarter Missions

Why

Today's threats move faster than human response. From sabotage to natural disasters, the speed and unpredictability of modern crises demand technology that interprets, decides, and acts in real-time`

Vision

To lead the future of defense and public safety through autonomous systems that think, decide, and act faster than any threat

Platform

Phalanx – AI software that transforms drone data into real-time mission decisions.

Delta – Edge-native drone that operates autonomously in contested environments. Contains no Chinese or non-U.S. technology.

Raising

To complete flight-ready prototype: autonomous takeoff, stabilization, flight, and landing

Market Focus

Defense & National Security
Autonomous ISR and rapid threat response

Critical Infrastructure
Monitoring and incident response for power, borders, pipelines

Emergency Response
Aerial support for fires, disasters, and law enforcement

Team

Google JPL SPACEX TESLA SKYCATCH
